## **1. Introduction**

### **1.1. About this Manual**

This manual is intended to provide the user with an overview of the board and benefits, complete features specifications, and set up procedures. It contains important safety information as well.

### **1.2. Feedback and Update to this Manual**

To help our customers make the most of our products, we are continually making additional and updated resources available on the Boardcon website ([www.boardcon.com](http://www.boardcon.com) , [www.armdesigner.com](http://www.armdesigner.com)).

These include manuals, application notes, programming examples, and updated software and hardware. Check in periodically to see what's new!

When we are prioritizing work on these updated resources, feedback from customers is the number one influence, if you have questions, comments, or concerns about your product or project, please no hesitate to contact us at [support@armdesigner.com](mailto:support@armdesigner.com).

### **1.3. Limited Warranty**

Boardcon warrants this product to be free of defects in material and workmanship for a period of one year from date of buy. During this warranty period Boardcon will repair or replace the defective unit in accordance with the following process:

A copy of the original invoice must be included when returning the defective unit to Boardcon. This limited warranty does not cover damages resulting from lighting or other power surges, misuse, abuse, abnormal conditions of operation, or attempts to alter or modify the function of the product.

This warranty is limited to the repair or replacement of the defective unit .In no event shall Boardcon be liable or responsible for any loss or damages, including but not limited to any lost profits, incidental or consequential damages, loss of business, or anticipatory profits arising from the use or inability to use this products.

Repairs make after the expiration of the warranty period are subject to a repair charge and the cost of return shipping. Please contact Boardcon to arrange for any repair service and to obtain repair charge information.

# 1 MINI3288 Introduction

## 1.1 Summary

MINI3288 is System on Module (SOM) based on the RK3288. The module has all pins function of RK3288, low cost and high-performance. Compatible with MINI3288.

RK3288 Integrate quad-core Cortex-A17 with separately Neon and FPU coprocessor, also shared 1MB L2 Cache. More than 32bits address will support up to 8GB access space.

Currently, latest generation and most powerful GPU is embedded to support smoothly high-resolution (3840x2160) display and mainstream game. Support OpenVG1.1, OpenGL ES1.1/2.0/3.0, OpenCL1.1, RenderScript and DirectX11 etc. Full-format video decoder, including 4Kx2K multi-format decoder.

Lots of high-performance interface to get very flexible solution, such as multi-pipe display with dual-channel LVDS, MIPI-DSI or MIPI-CSI option, HDMI2.0, dual-channel ISP embedded.

Dual-Channel 64bits DDR3/LPDDR2/LPDDR3 provide demanding memory bandwidths for high-performance and high-resolution application.

The single board computer has complete electronic documentation, schematics, demo applications, and third-party industry-standard C compilers and embedded development environments for evaluation. We are sure to have the right single board computer for your applications.

## 1.2 RK3288 Features

### •CPU

- Quad-Core Cortex-A17 Separately Integrated Neon and FPU per CPU 32KB/32KB L1 ICache/DCache per CPU Unified 1MB L2 Cache
- LPAE (Large Physical Address Extensions) , Support up to 8GB address space Virtualization Extensions Support

### •GPU

- Quad-Core Mali-T7 series, latest powerful graphics processor Architected for GPU computing
- Support OpenGL ES1.1/2.0/3.0, OpenVG1.1, OpenCL1.1 and Renderscript, Directx11

### •VPU

- Support MPEG-2, MPEG-4, AVS, VC-1, VP8, MVC with up to 1080p@60fps
- Support multi-format video decoder with up to 4Kx2K
- Support muti-format video encoder with up to 1080p@30fps

### •Video Interface

- Video Input: MIPI CSI, DVP
- Video display: RGB/ 8/10bits LVDS, HDMI2.0 to support maximum 4Kx2K display

### •Memory Interface

- Nand Flash Interface
- eMMC Interface
- DDR interface

### •Rich Connectivity

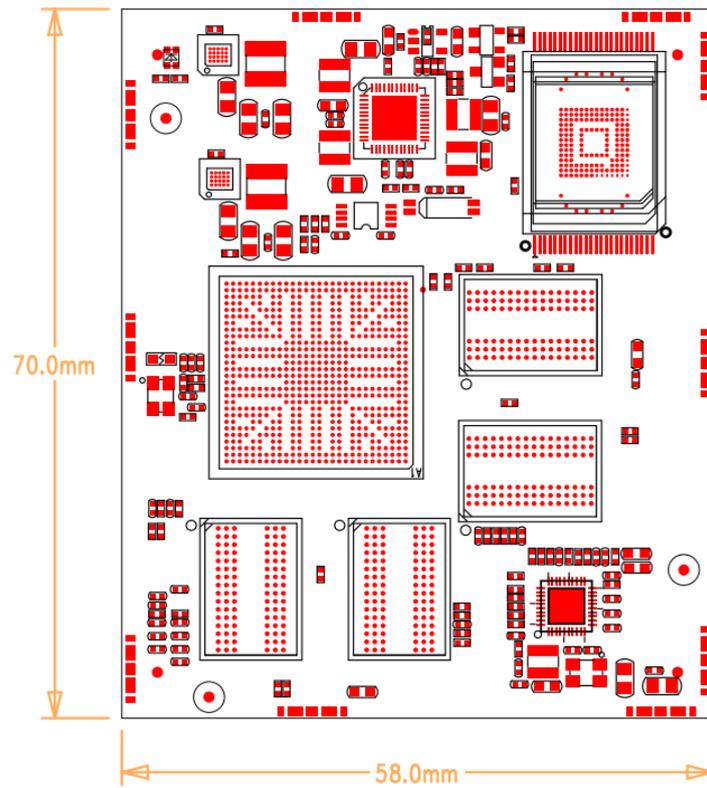

- 3 SD/MMC/SDIO interface, compatible with SD3.0, SDIO3.0 and MMC4.5

- One 8-channels I2S/PCM interface, One 8-channels SPDIF interface
- One USB2.0 OTG, Two USB2.0 Host
- 100M/1000M RMII/RGMII Ethernet interface
- Dual channel TS stream interface, descramble and demux support
- Smart Card interface
- 4-CH UART, 2-CH SPI (option), 6-CH I2C(up to 4Mbps), 2-CH PWM (option)
- PS/2 master interface
- HSIC interface
- 3-CH ADC input

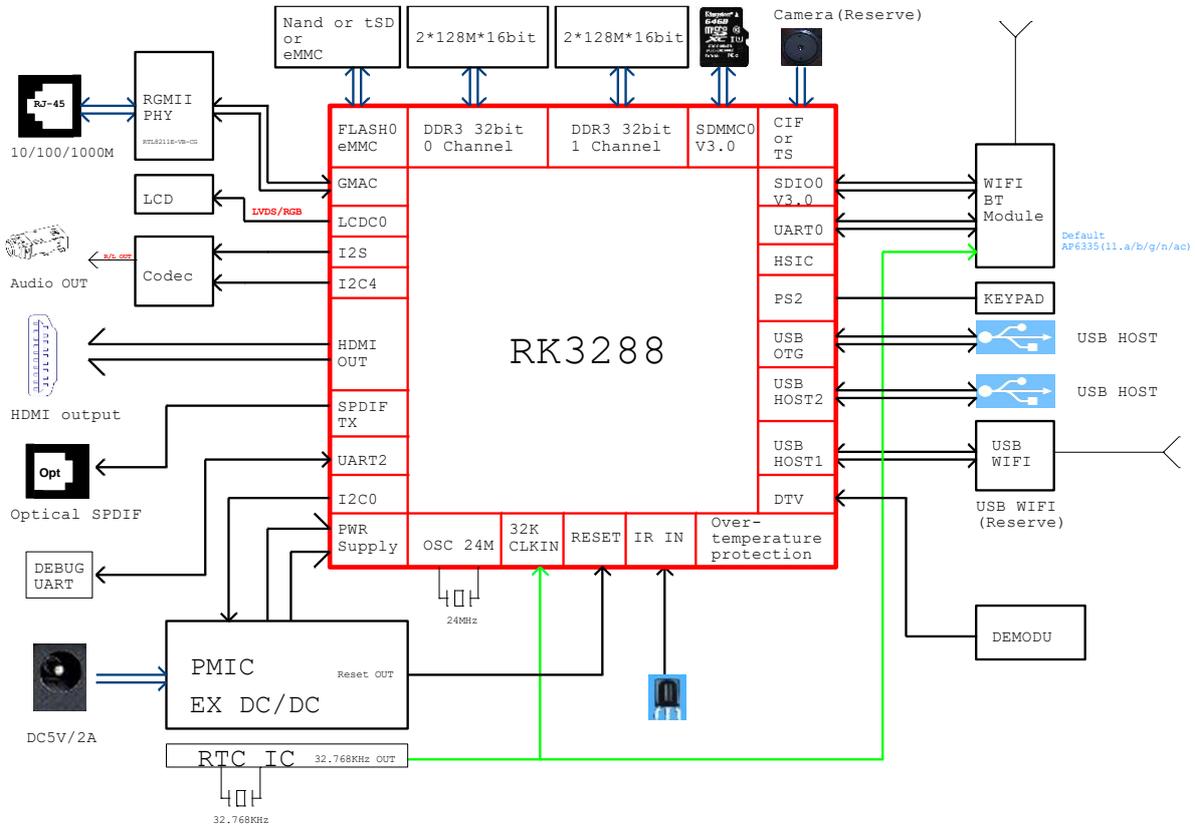

## 1.3 MINI3288 Features

Feature	Specifications
CPU	RK3288 Quad-core ARM Cortex-A17 MPCore processor
Memory	Default 512MB DDR3L
NAND Flash	8GB eMMC Flash
Power	DC 3.6V-5V power supply
PMU	ACT8846
UART	4-CH (up to 5-CH, option by SPI0)
RGB	24-bit
LVDS	1-CH 10bit DuI-LVDS
Ethernet	1 Gigabit (RTL8211 on board)
USB	2-CH USB2.0 Host, 1-CH USB2.0 OTG
SPDF	1-CH
CIF	1-CH DVP 8-bit and MIPI CSI
HDMI	1-CH
PS2	1-CH
ADC	3-CH
PWM	2-CH (up to 4-CH, option by UART2)
IIC	5-CH
AUDIO IF	1-CH
SPI	2-CH
HSMC/SD	2-CH
Dimension	70 x 58 mm
